SAGE Monthly Security / Firmware Update Notice

Post Date: 4/28/2020

Update Summary:

We did release C3414-500-S02K4_P3 firmware update in April 2020, which fixes an issue when using RADIUS after upgrading from a previous secure firmware version. Using the updated configuration converter included in this firmware resolves any potential issues.

There were no vulnerability (CVE) patches released in April 2020.
