

SAGE Monthly Security / Firmware Update Notice

Post Date: 7/2/2024

Summary of security related changes for June 2024.

Vulnerability Update:

- The following third-party component has been updated to address cybersecurity vulnerabilities:
OpenSSL 1.0.2zh

Operational Update:

- DNPM: Fixed test for correctly formed DNP3 application headers when received from outstation. Test caused incorrect reject of application header in data responses.

Cybersecurity Update:

- Remove possible DOS attacks in webserver due to buffer overflow, file uploaded without proper User Permissions
