MD5 Hashes: .....	2
SHA256 Hashes: .....	3

## Introduction:

This document contains all the MD5 and SHA256 hashes for the latest SAGE firmware update packages.

The latest C3414 secure firmware update packages can be found [here](#) on the Firmware tab.

Older firmware versions can be downloaded from our [archives](#) for the 2200, 2300, 2400 Non-Secure.

Please Contact [chris.kerr@se.com](mailto:chris.kerr@se.com) if there is a file you would like added to the lists.

These hashes provide a method for customers to verify the integrity of the downloaded firmware files from <https://www.sage-rtu.com>

Customers may perform a SHA256 hash on their locally downloaded file and compare it to the values provided in this document. If they match, the customer can be assured that when they have downloaded is what we intended to release to customers.
